

MARKETPLACE

Discover and engage with the right outside counsel globally.

Priori Marketplace clients include Fortune 100 multinationals to fast-growing tech startups who engage lawyers from our vetted network for projects of all types including overflow support, full-time secondments, flexible resourcing, staffing and projects requiring niche expertise. Our software drives efficiency at each stage of the process and can help you reduce legal spend, meet DEI goals and eliminate inefficiencies in your outside counsel hiring practices.

HOW IT WORKS

Quickly and efficiently connect with the right provider at the right price at the right time.

Submit an RFP

Discovering the perfect provider on Priori Marketplace is as easy as performing a search. Our interactive questionnaire streamlines the request for proposal process for legal projects using data.

Receive a Proposal

Our technology takes your inputs and combs the attorney network for matches. You'll receive a curated shortlist of qualified attorneys, usually in 1-2 days or fewer.

Make Your Decision

Our network has thousands of attorneys and we use a three-stage vetting process including an online application, video interview and reference checks. You can schedule screening calls, message an attorney or request project-specific bids directly in the platform.

“ It just works... it comes back to the **quality** of candidates, the **speed** and **ease** of bringing them in and that makes it efficient. And **efficiency is cost savings**.

- Carol Hopperton, Legal Chief of Staff, Vonage
